

GROSS-PAY CALCULATION

```
#include<stdio.h>
void gross(int n);
int n;
void main()
{
    printf("Enter The Basic Salary\n");
    scanf("%d",&n);
    gross(n);
}

void gross(int n)
{
    float hra,da,net;
    if (n<=10000)
    {
        hra=n*0.2;
        da=n*0.8;
        net=n+hra+da;
    }
    else if (n<=20000)
    {
        hra=n*0.25;
        da=n*0.9;
        net=n+hra+da;
    }
    else if (n>20000)
    {
        hra=n*0.3;
        da=n*0.95;
        net=n+hra+da;
    }
    printf("The Net-Salary Is---->>>%f",net);
}
```
